[OBRL](#) Quarterly #7, December 2004
 (Yahoo Groups version)

***Wishing you all the best Holiday Seasons Greetings
 Merry Christmas, Happy [Hannukah](#) and Joyful Solstice
 and a very productive Happy New Year as well.
 James [DeMeo](#), Ph.D., Director***

Eight topical notices below:

1. Conference on New Research in [Orgonomy](#), 2005
and [CALL FOR PAPERS](#)
2. [Greensprings](#) Summer Seminars 2005: [Orgone](#) Physics, [Bions](#) & Reich Blood Test,
Independent Study...
3. [Orgone](#) Biophysical Research In Progress:
 - A) [Orgone](#) Accumulator Thermal Anomaly
 - B) Atmospheric Potentials
 - C) [Oranur](#) Physics & Radioactivity
4. Published and Forthcoming Articles
5. Book Donations to [OBRL](#)
6. Once Again, On the Controversial Nature of [OBRL-News-Bulletin](#)
7. The [OBRL/NEW](#) Bookstore List
8. Funding/Donation Appeal

1. Conference on New Research in [Orgonomy](#), 2005 [OBRL](#) will be hosting a two day "Conference on New Research in [Orgonomy](#)", on 6-7 August 2005, at the [OBRL Greensprings](#) Center near Ashland, Oregon. The Conference will focus upon new research findings in the field of social and [orgone-biophysical orgonomy](#), and will include lectures, with slides and demonstrations. The event will be open to the general public for attendance. A preliminary list of speakers and presentations will include, but not be limited to the following:

- * Richard [Blasband](#): "Consciousness and [Orgonomic](#) Theory"
- * James [DeMeo](#): "A [5-Year](#) Desert Greening Project in [Eritrea](#), Africa"; and "New Observations on Spontaneous Heat Production Inside the Reich [Orgone](#) Energy Accumulator".
- * Tom [DiFerdinando](#): "An [Orgonomically-Based](#) Therapy for Pain and Injury"; and "Pod or Pseudo Pod: A Bio-Ecological Clarification of Psychosomatic Identity and Antithesis"
- * Joseph [Heckman](#): "Plant Growth Response to [Orgone](#) Accumulators"
- * Peter Jones: "[Bastian's](#) [Plastide](#) Particles and the [Bions](#)"
- * [Roberto Maglione](#): "[Orgone](#) accumulator field experiments with Corn Seed", and a review of the author's new book "[Wilhelm](#) Reich and the Modification of Climate"

[CALL FOR PAPERS](#): Space is still available for a few additional speakers. Professionals and independent scholars who wish to present new research findings in the field of natural scientific or social [orgonomy](#) at this Conference should submit their presentation ideas for consideration to Dr. James [DeMeo](#), with the following information: A one-page Abstract of no more than 500 words, suitable for photocopy reproduction and distribution at the Conference, with the author's name, professional

status and contact information. This can be sent by postal mail, or [emailed](#) as an attachment. A sample Abstract form appears on the Conference [webpage](#), along with other pertinent information:

<http://www.orgonelab.org/Conference2005.htm>

2. Greensprings Summer Seminars 2005. In addition to the above Conference, [OBRL](#) will host two additional weekend workshops (immediately before and after the Conference) plus the on-going Independent Study program, as follows:

* 30-31 July 2005: [Orgone](#) Physics and the Cosmological "Ether Drift"

<http://www.orgonelab.org/events.htm>

* 6-7 August 2005: Conference on New Research in [Orgonomy](#)

<http://www.orgonelab.org/Conference2005.htm>

* 13-14 August 2005: Microscopy Workshop: [Bions](#), Biogenesis and the Reich Blood Test

<http://www.orgonelab.org/events.htm>

* 26-27-28 July, 2-3-4 August, 9-10-11 August 2005: Independent Study Program

<http://www.orgonelab.org/events.htm>

3. [Orgone](#) Biophysical Research In Progress

A) [Orgone](#) Accumulator Thermal Anomaly. The late Albert Einstein once called Reich's "To-T" experiment -- measuring the temperature inside an [orgone](#) energy accumulator relative to the temperature outside of it -- a "bomb in physics". He verified Reich's experiment, but later swept the matter aside. Now into the second year of work, new automated [To-T](#) apparatus at [OBRL](#) has provided yet another wonderful verification of Reich's original discovery, of spontaneous heat production inside the [orgone](#) accumulator. The following photos can now be made public, of a newly-developed rotating [To-T](#) device, which balances out residual thermal variations where the measurements are made. Data is recorded automatically, via Mac computer using the Vernier Logger Pro software. Two systems are in constant operation, one indoors, and the other outdoors inside a special thermal shelter. Details will be presented at the forthcoming 2005 Conference (see above).

Rotating [To-T](#) apparatus inside thermal hut, [OBRL Greensprings](#) Center.

<http://www.orgonelab.org/graphics/rotation.jpg>

Results from 10 days of constant measurement in Summer 2004, showing diurnal [pendulation](#) of [To-T](#), with peak at solar noon, though the entire apparatus was shielded from solar visible and thermal ([IR](#)) radiation. In case the image does not come through in your email, click here to view:

<http://www.orgonelab.org/graphics/thermal.jpg>

B) Atmospheric Potentials. The electrical charge of the atmosphere, using a long wire antenna attached to a Vacuum-Tube [Millivoltmeter](#) ([Kiethley 610-B](#)), is being constantly monitored, following on the early experiments of Harold [Saxton](#) Burr on the "electrodynamic field" model. Experiments are confirming what many have long anticipated, that the Burr method for measurement of atmospheric potentials shows parallel results to thermal excitation in the [orgone](#) accumulator. A new set of readings is planned, to evaluate electrostatic discharge rates parallel to the other two parameters. Dr. [DeMeo](#) undertook extensive [millivoltmeter](#) experiments during the [1970's](#) and [80's](#), as a means of measuring atmospheric [oranur](#) effects, but only recently has this same research track been opened to renewed investigation. Demonstrations of the [millivoltmeter](#) detection methods are a regular part of the [OBRL](#) seminars.

C) [Oranur](#) Physics & Radioactivity. A new set of experiments is in development, to make a very controlled and scaled-down evaluation of Reich's prior observations on the "[oranur](#) effect", and related anomalous transmutations of radioactive materials. This work will require sensitive radiation detection equipment which [OBRL](#) does not presently have, for both

quantitative and qualitative evaluations of radioactive decay rates. If you can assist with this new project financially, please review the fund-raising letter attached below.

4. Forthcoming and Published Articles.

A) A two-part article appeared in "World Cultures: Journal of Comparative and Cross-Cultural Research". James DeMeo "A 'Saharasian' Climate-linked Geographical Pattern in the Global Cross-Cultural Data on Human Behavior" World Cultures Vol.14, No.2, Spring 2004, p.111-143. <http://eclectic.ss.uci.edu/%7Edrwhite/worldcul/world.htm>

B) Another article on the topic of "Cosmological Ether-Drift" and its relationship to orgone energy and the "dark matter" question will also soon appear in the physics journal, Galilean Electrodynamics. The article "A Substantive and Tangible Cosmological Ether", reconciles both Wilhelm Reich's "Cosmic Superimposition" theory and Dayton Miller's "Earth-entrained Ether" to modern astrophysics and "dark matter" observations. A pre-press copy is available for review here: <http://www.orgonelab.org/DynamicEther.pdf>

C) An article in Spanish "Reich: [sobre bebés y niños](#)" recently appeared in the journal *Medicina Holística: Medicinas Complementarias* No.72, p.326-330. It discusses James DeMeo's [Saharasia](#) work, in the nature of a short review, as authored by [Cristina Marin](#).

Other new articles and books coming to our attention will be announced via the [OBRL](#) email newsletters as they are published.

5. **Book Donations to OBRL.** Several individuals have, in recent months, contributed sets of Reich books and old journals of great historical value for [orgonomy](#) to the [OBRL](#) Library and Archives. These donations are greatly appreciated, as there always is a demand for old journals and out-of-print books by Reich, or on the subject of [orgonomy](#) in general. If you have such books and are considering to throw them out, please consider gifting them to [OBRL](#), where we can add them to our library collection, or otherwise put them into the hands of students and others who will continue to reap a benefit.

6. **Once Again, on the Controversial Nature of [OBRL-News-Bulletin](#): [OBRL-News-Bulletin](#)** has, for recent years, predominantly focused upon the topic of DeMeo's "[Saharasia](#)" and Reich's "Mass Psychology of Fascism", as they are played out in recent years on the international social scene, most notably in [Islamic-Saharasian](#) regions. The various postings have stimulated much open discussion and controversy, and will continue more or less into the foreseeable future, just as the problem of international terrorism and the new epoch of global spreading of "[Saharasian](#)" cultural/emotional armoring continues. Of special concern is the growing global spread and influence of the [Wahhabist](#) variant of Islam, which originated in the deserts of Saudi Arabia, and has taken on a quality even more deadly than what occurred in Europe during the Medieval period of female genocide ("witch-burning"), as organized by the Christian Church. It appears to be radicalizing and supplanting all other branches of the Islamic faith -- being promoted via ~70-Billion dollars per year from its hyper-puritanical sponsors in Saudi Arabia, at the core-epicenter of [Saharasia](#). The [Wahhabist](#) creed constitutes the emotional foundations of the [Talibans](#), [Osama Bin Ladin](#), the murderers of Russian school-children, and various suicide-bomber-murder cults from New York to Madrid, Palestine to Bali. It is far more threatening to human life, love and freedom, and better organized and funded, with ongoing political support from many [Saharasian-Islamic](#) nations, than any other life-negative ideology one might point to by comparison. As demonstrated with exacting and painful detail in DeMeo's book "[Saharasia](#)", this form of hardened anti-life ideology, and the character structures who carry it, was born within the harsh deserts of Arabia. It was used as a prototypical model in DeMeo's original [Saharasian](#) research for the most extremely armored and patristic character structure observed and described by cross-cultural researchers in anthropology. While some have argued that human [characterological](#) armoring "is global" today, or that "violence is global", or that "structural violence" within Western democracies is comparable to the armored [patrism](#) of modern Islam, objective analysis refutes this assertion utterly, and the original [Saharasian](#) maps continue to be a powerful predictor of global events. There is substantive evidence to demonstrate a lower incidence of armoring and social violence within the modern-day nations most geographically distant from [Saharasia](#), just as recorded in the original [Saharasia](#) maps published in the early 1980s. In fact, the history of the bloody 20th Century indicates those regions geographically closest to [Saharasia](#) fell to the fascist plague most readily and willingly -- specifically Nazi Germany, the Soviet Union, Red China and Imperial Japan -- and together with the [Islamist](#) variant of totalitarian social structure, they constituted the largest historical spreading of violent-armored patristic character structure in the history of the world. Genocides and mass-murder, going well beyond even the Nazi Holocaust, were the consequence, and there is virtually nothing even remotely approaching these levels of sadistic mass-violence within the nations distant from [Saharasia](#). This is fact, even though the *Emotional Plague of Mankind* (Reich's term) has infected nearly every nation to a greater or lesser extent. The peak expression of this geographical pattern was in the mid-20th Century. More will be said on this subject in DeMeo's future publications, but the reader who is fully ignorant of the details underlying

this provocative paragraph should obtain the original book -- *Sahasrasia: The 4000 BCE Origins of Child Abuse, Sex-Repression, Warfare and Social Violence, In the Deserts of the Old World* -- most quickly and directly from the [OBRL online](http://www.orgonelab.org) bookstore:

<http://www.orgonelab.org/cart/xdemeo.htm> This is controversial material, certainly, as upsetting for people anchored on the conservative-right as on the liberal-left sides of the [characterological](#)/sociological political split. It goes to the functional core of the human dilemma, following on Reich's important discovery of human armoring and those factors which create the "Mass Psychology" of fascism and social violence. *OBRL News Bulletin* will continue to be a conduit for relevant materials. For now it is simply restated that Reich's discoveries, and [DeMeo's Saharasia](#) findings are a "red-hot coal" dropped into the hands, which challenge major parts of nearly everyone's world view, while also providing an exceptionally clear understanding of the "why" behind turbulent historical and current events.

7. The [OBRL/NEW Bookstore List](#). Our Internet Bookstore continues to offer some of the most controversial and difficult-to-obtain titles on new science discoveries and social concerns, including many "timeless" titles by scientist-authors whose findings only grow in significance with passing years. The [booklist](#) includes the available published works by [Wilhelm Reich](#), A.S. [Neill](#), Harold Burr, Frank Brown, Dayton Miller, [Giorgio Piccardi](#), [Viktor Schauberger](#), and many others. We also offer meters for detection of low-level electromagnetic and nuclear radiation, and the newly-developed Life Energy Meter. If you haven't visited our Internet Product and Bookstore recently, come take a look.

<http://www.orgonelab.org/naturalenergy>

Specifically we can recommend our latest publication *Heretic's Notebook: Emotions, Protocells, Ether-Drift and Cosmic Life Energy, with New Research Supporting Wilhelm Reich*. If you have an interest in Reich's discoveries, this book provides some of the most substantive, objective and up-to-date research on the subject:

<http://www.orgonelab.org/cart/xpulse.htm>

8. Funding/Donation Appeal. [OBRL](#) continues to suffer from financial difficulties. There always is a pressing need for new laboratory apparatus, and the small reservoir which was used to help finance our Summer seminars over eight years is now depleted -- the summer seminars always cost [OBRL](#) far more than they brought in from fees, and so it is very likely the fees will be increased for 2005. If you are in a position to donate to [OBRL](#), please do so at this [webpage](#):

<http://www.orgonelab.org/cart/donation.htm>

For more details, please review our most recent Funding Letter:

<http://www.orgonelab.org/funding.htm>

In the meantime, we will reprint our email fundraising letter below.

+++++

Subject: PLEASE SUPPORT [OBRL](#) - Winter 2004-2005 Funding Drive

Dear [OBRL-Quarterly](#) Subscriber,

For over twenty-five years, The [Orgone](#) Biophysical Research Laboratory ([OBRL](#)) has relied upon the generosity of a limited number of donors, including our subscribers.

As participants at past [OBRL](#) Seminars, readers of our publications (Pulse of the Planet, Heretic's Notebook, [Sahasrasia](#), [Orgone](#) Accumulator Handbook) and of the [OBRL](#) postings, you are familiar with the research of Dr. James [DeMeo](#) and his informal circle of associates, including laboratory findings, desert-greening field work, and educational efforts aimed at maintaining clarity and furthering the sociological and [orgone](#) biophysical work started by the late Dr. [Wilhelm Reich](#).

The research undertaken at [OBRL](#), and our seminars and publications, as well as the maintenance and development of [OBRL](#) offices and [website](#), requires substantial resources.

HELP [OBRL](#) TO CONTINUE WITH THIS IMPORTANT WORK.

We request that you, as a valued participant in our efforts, consider sending a financial contribution. Your donation will help us continue with this vitally important work and our innovative programs, which include:

- Laboratory Studies on the [Orgone](#) Energy. The current focus is upon the [Orgone](#) Accumulator Thermal Anomaly, which has yielded significant positive results.

<http://www.orgonelab.org/research.htm>

- Historical and Analytical Research, on the subject of "Ether-Drift" research since the 1900s, including the work of Prof. Dayton Miller, and their relationship to the findings of Reich and others on cosmic [orgone](#) energy, and planetary/atmospheric dynamics.

<http://www.orgonelab.org/miller.htm>

<http://www.orgonelab.org/MillerReich.htm>

<http://www.orgonelab.org/DynamicEther.pdf>

- Field Research with the Reich [Cloudbuster](#). Past field-research programs in the American Southwest, Namibia, Israel and [Eritrea](#) were only possible with significant help from donors.

<http://www.orgonelab.org/PressRelease2.htm>

- Archaeological and Historical Research on Peaceful Societies and the "Origins of Violence" question, with a recent emphasis through our [OBRL-News-Bulletin](#) on the growing threat of Islamic terrorism and the spread of "[Saharasian](#)" Islam into Western democratic societies.

<http://www.orgonelab.org/PressRelease1.htm>

<http://groups.yahoo.com/group/OBRL-News-Bulletin>

- The Bibliography on [Orgonomy](#) (1920 to the present) posted to the [OBRL](#) web site and now available via global [internet](#) to everyone without charge.

<http://www.orgonelab.org/bibliog.htm>

- Archive and Publication of Video/[DVD](#) Productions. Our considerable archive of videotaped lectures and documentation of field expeditions and laboratory work is now up to 15 years old. We are now in process of transferring this important historical material to [DVD](#), for permanent archive and safekeeping.

<http://www.orgonelab.org/funding.htm>

- Books and Publications, including our in-house journal Pulse of the Planet, continue to spread accurate and timely information world-wide.

<http://www.orgonelab.org/naturalenergy.htm>

- [Greensprings](#) Seminars. Held every summer at the [OBRL Greensprings](#) Center near Ashland, Oregon, since 1996. In Summer 2005 we will host two weekend seminars -- on the "[Orgone](#) Energy Accumulator", and on "[Bions](#), Biogenesis and the Reich Blood Test" -- as well as a special "Conference on New Research in [Orgonomy](#)".

<http://www.orgonelab.org/events.htm>

<http://www.orgonelab.org/Conference2005.htm>

- NEW PROJECT IN PREPARATION: Study of the "[Oranur](#)" phenomenon in relation to radioactive transmutation. This new project aims to verify Reich's prior observations on this important subject, which holds the potentials for detoxifying nuclear waste.

As Winter of 2004-2005 begins, [OBRL](#) still needs to meet its financial goals for this fiscal year, while planning ahead for 2005.

PLEASE CONSIDER MAKING A DONATION [ONLINE](#)

To donate right now visit: <http://www.orgonelab.org/donation>

For [OBRL](#) to continue with this important work, we need your support. Donating [online](#) is a simple and secure method. [OBRL](#) is a 501(c)3 status non-profit organization, and your donation is fully tax-deductible.

Your donation check can also be mailed to [OBRL](#), at: [OBRL](#), PO Box 1148, Ashland, Oregon 97520 USA.

To request more information, or to inquire about making a larger gift or bequest, please call at the number below, or email to: demeo@mind.net *Thank you in advance for your support.*

Sincerely,

James [DeMeo](#), Ph.D., Director
[Orgone](#) Biophysical Research Laboratory
[Greensprings](#) Center
