

THE ORGONE ACCUMULATOR HANDBOOK

**Wilhelm Reich's Life-Energy
Discoveries and Healing Tools
for the 21st Century,
*with Construction Plans***

**James DeMeo, Ph.D.
Foreword by Eva Reich, M.D.**

A photograph of an astronaut in a white spacesuit standing on the lunar surface. The astronaut is positioned in the center-left of the frame, facing away from the camera. To the right, there is a piece of lunar equipment, possibly a rover or a scientific instrument. The ground is dark and rocky, and the background is a bright, hazy sky. The overall scene is illuminated by a strong light source, likely the sun, creating a high-contrast environment.

Newly Expanded and Revised Edition

Banned and Burned by the FDA!

"Orgone Energy Does Not Exist" declared a US federal court judge in 1954, based upon journalist and FDA slanders, ordering the destruction of all publications bearing the forbidden word "orgone". Dr. Reich was later hauled off to prison, where he died. A scandal worse than the "Scopes Monkey Trial" and yet the facts about Dr. Reich continue to be concealed or misrepresented.

In this book, former university professor and natural scientist James DeMeo draws from his extensive personal investigations and experiments to present the facts about Reich's discoveries, specifically focusing upon the controversial *Orgone Energy Accumulator*, which is a bona-fide form of *Energy Medicine* used the world over. Here, the reader will learn how to build and safely use orgone blankets and accumulators, with details on orgone-charged *Living Waters* of natural hot springs and healing water spas, and many other related issues.

Learn how to concentrate and work with the blue-glowing orgone (life) energy using simple and readily-available materials. A limitless supply is freely available from the atmosphere. Includes many photos and diagrams plus two appended research articles, bibliography, index and weblinked references.

ISBN 978-0980231632

Library of Congress Catalog Card No. 89-90975

Front Cover: NASA photo of Apollo 12 astronaut walking on the surface of the moon (see Life Magazine, 12 Dec. 1969). His body orgone energy field is softly glowing a blue color in the lunar vacuum, possibly due to excitation by his high-frequency radio communications equipment. This blue coloration of the energy field in the photo, which has been seen in a few other lunar astronaut images (but often deleted in published versions) has been systematically ignored or explained away as an effect of "lunar dust", "water vapor" or "camera lens smudges". In fact, it is a visible expression of the human orgone (life) energy field. For more information, see:

<http://www.orgonelab.org/astronautblues.htm>

Rear Cover: Orgone accumulator stimulation of sprouting mung beans, experiment by author, see page 153.

“We consider the discovery of the orgone energy among the greatest events in human history.”— from a letter to the American Medical Association, signed by 17 medical doctors in 1949.

“THE ORGONE ACCUMULATOR IS THE MOST IMPORTANT SINGLE DISCOVERY IN THE HISTORY OF MEDICINE, BAR NONE” – Theodore P. Wolfe, M.D., from *Emotional Plague Versus Orgone Biophysics*, 1948.

“It is justifiable that the discovery of orgone energy and its medical applications by means of the orgone accumulator, the orgone shooter, bionous earth, and orgone water have opened up an abundance of new and, it appears, amazingly good prospects.” – Wilhelm Reich, M.D. from *The Cancer Biopathy (Discovery of the Orgone, Volume 2)*, 1948.

“What would you say of the leading philosophers here to whom I have offered a thousand times of my own accord to show my studies, but who with the lazy obstinacy of a serpent who has eaten his full have never consented to look at the planets, the moon, or telescope? To such people philosophy is a kind of book... where the truth is to be sought not in the Universe or in nature, but (I use their own words) by comparing texts.” – Galileo Galilei, Italian astronomer of the 1600s who proved that the Earth moved in the heavens, shortly before being prosecuted and threatened with torture by the Catholic Church. From a letter to Kepler, 19 August 1610.

“...the orgone energy does not exist.”— Judge John D. Clifford, from a 1954 U.S. court ruling in which all of Dr. Reich’s books and research journals were banned, and ordered burned in incinerators; Reich was later sent to a Federal Penitentiary, where he died

**About the
Orgone Biophysical Research Lab
(OBRL) and Greensprings Center**

The Orgone Biophysical Research Lab is a non-profit science research and educational foundation, established in 1978. Over the years, OBRL has supported various laboratory and field research projects, educational lectures and seminars in both the USA and overseas, focused upon the sex-economic and orgone biophysical discoveries of the late natural scientist, Wilhelm Reich, MD. OBRL also publishes a journal, *Pulse of the Planet*, on an irregular basis. The founder and director of OBRL, James DeMeo, PhD., has been investigating and extending Dr. Reich's original findings in both the social and natural sciences since 1970. Early in 1995, the *Greensprings Center* was established in a vibrant forested region of rural Oregon, to provide a better foundation for continued public outreach and in-depth study of orgone energy functions in nature. The *Center* also has the West Coast's only *Orgone Energy Darkroom*, for experiments requiring a higher energy charge, and for direct visual observation of orgone energy functions. New books are also occasionally published, and public educational programs, the *Greensprings Seminars*, are held in summer. Accomplished scholars in the field of orgonomy are invited periodically to share their knowledge and experience with interested students and professionals from around the world. OBRL programs have included seminars on *Bions*, *Biogenesis and the Reich Blood Test*, *The Orgone Energy Accumulator*, and *Guided Independent Study*, and a conference on *New Research In Orgonomy*. To get on the OBRL e-mail list, and access back issues of the OBRL Newsletter, visit this webpage: www.orgonelab.org/OBRLNewsletter.htm

***SAHARASIA: The 4000 BCE
Origins of Child-Abuse,
Sex-Repression, Warfare and
Social Violence, In the
Deserts of the Old World,***
by James DeMeo

Dr. DeMeo's *magnum opus* on the origins of human violence and biophysical armoring, the first geographical, cross-cultural study of human behavior around the world, using Wilhelm Reich's sex-economic discoveries as a basic starting point, presenting world maps of different behaviors and social institutions. Source-regions (Arabia and Central Asia) for patriarchal authoritarian culture were identified, and migratory-diffusion patterns were traced, back in time, to pinpoint where and how the human tragedy began. Solves the riddle of the origins of human violence and armoring. A breakthrough in the scientific study of human sexuality, psychology and anthropology, and must-reading for every parent, student, professor and clinical worker in the field of human health and behavior. 464 pages, with over 100 maps, photos, and illustrations. Large format with vivid full-color cover, extensive bibliography and index.

On Wilhelm Reich and Orgonomy

Edited by James DeMeo

Contains Reich's milestone articles on psychic and somatic (mind-body) processes, and on the bioelectrical aspects of human emotion and sexuality, with articles by R.D. Laing on Reich, and a discussion on Reich's work in Denmark when he fled Nazi terror in Germany and was also expelled from the International Psychoanalytic Association. Other papers discuss: Reich's research on biogenesis and discovery of the microscopical *bion*;

The Orgone Accumulator Handbook

the discovery of orgone (life) energy, and the orgone energy accumulator. Also featured are articles about the Food & Drug Administration's attack upon Reich, and their present-day war against the natural health movement; the deadly effects from nuclear power plants, and an illuminating scientific challenge to the HIV theory of AIDS — plus other reports on current life energy research, weather anomalies from nuclear bomb tests, a cloudbusting desert-greening experiment in Israel, provocative book reviews, and more!

176 pp.

Heretic's Notebook: Emotions, Protocells, Ether- Drift and Cosmic Life- Energy, with New Research Supporting Wilhelm Reich, Edited by James DeMeo

Contains 28 insightful essays and research articles by 17 different authors, on natural childbirth, sexuality, archaeology of early human violence, Reich's orgonomic functionalism, exposés on Reich's detractors, Giordano Bruno's work, bion-biogenesis research, Dayton Miller's ether-drift discoveries, emotional effects in REG (psychokinesis) experiments, new detector for orgone energy, dowsing research, cloudbusting desert-greening experiments in Africa, plant growth stimulation in the orgone accumulator, the orgone energy motor and "free energy", plus UFO research, book reviews, and much more, with color cover photos, text- photos and illustrations.

272 pages

**John Ott:
Exploring the Spectrum
DVD-Movie**

Directed by John Ott

An exciting video journey through the world of time-lapse photography by one of the founders of the science of photobiology.

Do fluorescent lights cause cancer and childhood learning and behavior disorders? Can long-term exposure to low-level radiation as from TV sets, computers, fluorescent lights, and similar devices harm your health? Does living behind window glass and with glasses covering our eyes over years affect our health? Is natural sunlight and trace ultraviolet radiation really harmful to our health? Or is it necessary and beneficial? How do cells, plants and animals respond to constant exposure to different light color frequencies? Does *mal-illumination and electrosmog* create nervous agitation and a weakened immune system? These and similar questions were the subject of Dr. John Nash Ott's pioneering investigations in the field of photobiology, using the methods of time-lapse photography. In an era of increasing low-level electromagnetic pollution, where everyone is "wired up" to the internet 24/7, and even children have the latest cell phones, iPods, blueberrys and other Wi-Fi gizmos, with eyeballs glued to display screens, Dr. Ott shows we are paying the price with our health and biology. Our indoor lifestyles and chronic wearing of UV-blocking eyeglasses and contact lenses additionally has deprived us of biologically-necessary natural trace-ultraviolet and bluer frequencies of light, with an irrational and nearly superstitious fear of natural sunlight. Dr. Ott's time-lapse movies, reproduced here, show how plants and animals are deeply affected in movement, growth, form and sexual behavior, by these significant bioenergetic changes in our natural living conditions. This is a wonderful video showing Dr. Ott's original film sequences, including entire plants growing from a seed to fruit in less than a minute. A fascinating nature study for both adults and children. 80 minutes, with humorous introduction. Multi-Region.
