Recent Space Science Discovery of *Cosmic Water*

Water may be the most abundant molecule in the Universe: Moons, Comets, Planets, Nebulae with Water Ice Massive quantities discovered around Quasar APM 08279+5255 "It's another demonstration that water is pervasive throughout the universe, even at the very earliest times."

> https://www.nasa.gov/topics/universe/features/ universe20110722.html

Questions: Why do some *rare* pools of shallow water glow blue, while others do not?

Knick Glacier Alaska Morning Glory Pool Yellowstone Park, Wyoming USA Likewise, some glacial ice chunks also appear profoundly blue...

...are all these examples the result of "light scattering" In some cases, one can observe fully anomalous or astonishingly *blue glowing and transparent* atmospheric or liquid water.

Above: blue mountain haze, northern Greece.

Left: Crater Lake National Park, Oregon, USA

10/08/2005

Also intense blue halos around flowers, noted by biologists for their UV emissions & attraction for bees. Bluebeard, Hypatia, Lobelia

Also many reports of blue-glowing *healing* waters of natural hot-springs.

Are *all* such phenomenon due to merely "light scattering" as per Lord Rayleigh in c.1900?

Argument Against: For some natural atmospheric, Earth-surface, physico-chemical, biological & possibly even astronomical phenomenon, there is a correlated far-UV absorbance and *near-UV* / visible blue fluorescing property observed in Charged-Excited States of Water.

Heresy! Bulk "dead" water can be induced into a "living" near-UV & visible blue-fluorescing condition, by *non-contact charging* inside the *authentic* Wilhelm Reich *orgone accumulator*.

Not to be confused with the ridiculous "orgonite pyramids", trinkets etc. sold on internet, ebay, nor with the slander of Reich from Wikipedia & skeptic-club liars & FDA book-burners!

Absorbance (top) and Fluorescence (bottom) Snow Storm of 2 Dec. 2015 Minus Distilled Control

Figure 2. Spectra measured at varying distances (indicated on figure) from the Nafion surface.

Figure 6. Emission spectra from exclusion zone adjacent to the Nafion sheet with 270 nm excitation, at different distances from the Nafion surface. Respective distances are indicated. Excitation bandwidth = 10 nm; emission bandwidth = 10 nm.

The Absorbance-Fluorescence signatures from Orgone-charged water, & natural vigorous rains, are similar to EZ water samples near Nafion material Bing-hua Chai, Jian-ming Zheng, Qing Zhao, and Gerald H. Pollack "Spectroscopic Studies of Solutes in Aqueous Solution", J. Phys. Chem. A 112, 2242-224, 2008.

Similar spectrographic signatures are found in Water Absorption & Fluorescence from Aqueous Solutions of DNA From Lakowicz, et al. "Intrinsic Fluorescence from DNA..."

Biochemical and Biophysical Research Communications 286, 875–879, 2001.

Water Absorption (a) and Fluorescence (b) Signatures From Aqueous Solutions of DNA. From Vaya, et al., "Fluorescence of Natural DNA" J. Am. Chem.Soc. 132 (34), pp.11834-11835, 2010. Is Rayleigh Scattering the only explanation for the blues? No. Water fluorescence in blue frequencies occurs when UV light excites OR-charged or EZ water in the laboratory, or Solar UV excites healthy rains, snow & lakes within a naturally-charged environment.

Reich's term: Orgonotic Lumination

Crater Lake This is the water surface! Greek Mountain "Transparent Haze"

Added Proofs From Wilhelm Reich: Luminous blue vesicle (bion) radiation from Quartz Sand heated to red-hot Incandescence Photo from DeMeo Laboratory.

Added Proofs From Wilhelm Reich:

- * Boost of immune functions, parasympathetic stimulus, cohesion/charge of tissues; burn-wound tumor healing
- Many clinical studies published on biological, medical effects of the orgone accumulator.
- * Increased longevity in Cancer Mice (2x to 3x lifespan over controls), Plant-Growth Stimulus & Anomalies in physics experiments.

bb11dungen 40 und 41 vom 04.09.85

Added Proofs From Wilhelm Reich:

- Seed sprouting in water inside the dielectric/ ferromagnetic Orgone Accumulator shows growth enhancement over control enclosures.
- 4-year study at DeMeo Lab shows ~35% growth increase over control. p<0.0001

J. DeMeo: "Orgone Accumulator Stimulation of Sprouting Mung Beans", *Pulse of the Planet*, 5:168-176, 2002.

Additional Proofs From Wilhelm Reich Confirmed at DeMeo Lab

- Evaporation-Suppression effect of Orgone Accumulator, with a dependency upon Local Weather.
- Increase of *Electrical Charge Density* in the interior of the Orgone Accumulator. Suppression of Electroscopical Discharge
- Slight heat production inside the Orgone Accumulator, correlation to non-thermal Solar emissions.
- Increased count-activity in Geiger-Müller counter-tubes, correlation to Sunspot activity.

Blue fields around galaxies, M31 – Andromeda Orgone energy? Water? Misinterpreted as "dark matter"?

Summary

 Orgone-accumulator water shows UV Absorption signatures across ~240 to ~280 nm, and Fluorescence Lumination across ~300 to 500 nm.

- This is similar to spectrums of exclusion-zone (EZ) water, of vigorous rain and snowmelt, and of aqueous solutions of nucleic acids and DNA.
- 3. Ogone-accumulator charged water gains these spectral properties without direct physical contact to anything, other than the glass dish, and the atmosphere inside the accumulator. A non-contact Radiant-Field Effect, suggestive of a cosmic energy parameter. Reich's orgone energy, similar to older ideas of Cosmic Ether + Life Energy

Reich's Theory of Cosmic Superimposition The Cosmic Orgone moves in a spiral-form trajectory, the Spinning Wave, creating and shaping matter as it moves.

In observable small particles

In weather, hurricanes, galaxies

In sexual attraction and growth

In Solar-planetary motions

From this, we may Postulate:

Do EZ water, vigorous rainstorms, and Orgone-Charged Water in the laboratory all develop a Spiral-Form Molecular Structure, Similar to Nucleic Acids and DNA?

Are they all, DNA included, shaped into spiral forms by Cosmic Life-Energy factors?

Thank You!
